

PAMARGAN

1.0 Environmental Statement

Commercially 2007 was another successful year for Pamargan Products with sales exceeding the planned target.

Due to a greater commitment by the company management an Environmental Management System manual was raised which has strengthened and improved the environmental structure within the company.

This enabled the company to maintain their Green Dragon Level 4 status and also pass the Stage 1 pre-assessment audit for the ISO 14001 standard.

The main improvement in 2007 was made in waste management where we are now saving and recycling nearly all cardboard, plastic and office paper. A new contract has been made with a local contractor for the removal of metal swarf, all wooden pallets are recycled by our pallet supplier and our waste rubber is being stored ready for collection and recycling.

Our Company Environmental Policy forms part of this statement and is reviewed annually by management. The Statement and Policy are displayed in the main entrance, on the factory notice board, our web site and the Arena Network website.

Energy usage continued to be monitored through the year and our total CO2 count was 555 tonnes.

Our main objectives for 2008 are:

- To achieve ISO 14001 certification by the end of February.
- To re-source and recycle waste paint room cloth.
- To develop procedure for saving and recycling waste rubber.
- To save and recycle tin drink cans.
- To reduce general waste costs by 5%.
- Monitor gas, electricity and water data against number of parts produced and introduce energy saving actions to reduce our usage against last years' figures.
- Reduce CO2 emissions.

Details of these objectives are recorded in our Environmental Objectives and Targets document and reviewed annually.

Mr Mark Pace-Bonello
